

## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

### Listing of Claims

Claim 1 (currently amended): A method of buying media resources for an advertising campaign comprising the steps of:

creating a client job order;

transmitting a first mobile agent with a media availability query to a potential vendor,  
said first mobile agent configured to dynamically adjust to varying conditions;

receiving, via said first mobile agent, media availability from said potential vendor;

processing said first mobile agent to create a media buy confirmation and, in response,  
creating a second mobile agent representing said media buy confirmation; and

transmitting said second mobile agent representing said media buy confirmation to said  
potential vendor.

Claim 2 (previously presented): The method of claim 1 further comprising the steps of:  
receiving, via said second mobile agent, said media buy confirmation from said potential  
vendor.

Claim 3 (previously presented): The method of claim 1 further comprising the steps of:  
generating a buy authorization form including a first level of detail characterizing said  
advertising campaign;

accepting, via a third mobile agent, said buy authorization form;

processing said third mobile agent, and

identifying potential vendors and, in response, generating said first mobile agent  
containing said media availability query to said potential vendor.

Claim 4 (previously presented): The method of claim 3 further comprising the steps of:  
generating a media campaign proposal and, in response, creating a fourth mobile agent  
representing said media campaign proposal;

transmitting said fourth mobile agent representing said media campaign proposal to a  
client;

accepting, a fifth mobile agent; indicating client approval of said media campaign; and processing said fifth mobile agent to include information contained in said media campaign in said media buy confirmation.

Claim 5 (previously presented): The method of claim 1 further comprising the steps of: returning a sixth mobile agent representing an ad run confirmation; processing said sixth mobile agent to create a post-log entry and, in response, creating a discrepancy notification.

Claim 6 (previously presented): The method of claim 5 further comprising the steps of: creating a seventh mobile agent requesting a third party ad run confirmation; transmitting said seventh mobile agent representing said third party ad run confirmation request to said third party; and returning said seventh mobile agent representing third-party ad run confirmation.

Claim 7 (previously presented): The method of claim 3 wherein said step of accepting said buy authorization form includes a step of modifying data contained in a job order.

Claim 8 (original): The method of claim 1 wherein one of said steps of transmitting includes receipt of a corresponding one of said mobile agent and in response, automatic retrieval of data from a database in fulfillment of data requested by said corresponding one of said mobile agent.

Claim 9 (original): The method of claim 1 further comprising the step of: maintaining a database recording a state of each of said mobile agents.

Claim 10 (previously presented): The method of claim 1 further comprising the step of: reformatting data contained in at least one of said mobile agents to interface with a computer system used by an intended recipient of said at least one of said mobile agents.

Claim 11 (currently amended): A computer system configured to perform the following steps:

transmitting a first mobile agent with a media availability query to one or more pre-selected vendors, said first mobile agent configured to dynamically adjust to varying conditions; receiving, via said first mobile agent, media availability from said one or more pre-

selected vendors;

processing said first mobile agent to create a media buy confirmation and, in response, creating a second mobile agent representing said media buy confirmation; and

transmitting said second mobile agent representing said media buy confirmation to said one or more pre-selected vendors.

Claim 12 (previously presented): The computer system of claim 11 further configured to perform the follow step:

receiving, via said second mobile agent, media buy confirmation from said one or more pre-selected vendors.

Claim 13 (previously presented): The computer system of claim 11 further configured to perform the following steps:

generating a buy authorization form including a first level of detail characterizing said an advertising campaign;

accepting, via a third mobile agent, said buy authorization form;

processing said third mobile agent; and

identifying one or more pre-selected vendors and, in response, generating said first mobile agent containing said media availability query to said one or more pre-selected vendors.

Claim 14 (previously presented): The computer system of claim 13 further configured to perform the following steps:

generating a media campaign proposal and, in response creating a fourth mobile agent representing said media campaign proposal;

transmitting said fourth mobile agent representing said media campaign proposal to a client;

accepting, via a fifth mobile agent, client approval of said media campaign; and

processing said fifth mobile agent to include information contained in said media campaign in said media buy confirmation.

Claim 15 (previously presented): The computer system of claim 11 further configured to perform the steps of:

returning a sixth mobile agent representing ad run confirmation;

processing said sixth mobile agent to create a post-log entry and, in response, creating a

final discrepancy notification.

Claim 16 (previously presented): The computer system of claim 15 further configured to perform the steps of:

- creating a seventh mobile agent requesting a third party ad run confirmation;
- transmitting said seventh mobile agent representing said third party ad run confirmation request to said third party; and
- returning said seventh mobile agent representing third-party ad run confirmation.

Claim 17 (previously presented): The computer system of claim 13 wherein said step of accepting includes a step of modifying data contained in a job order.

Claim 18 (original): The computer system of claim 11 wherein one of said steps of transmitting includes receipt of a corresponding one of said mobile agent and in response, automatic retrieval of data from a database in fulfillment of data requested by said corresponding one of said mobile agent.

Claim 19(original): The computer system of claim 11 further configured to perform the step of:

- maintaining a database recording a state of each of said mobile agents.

Claim 20 (currently amended): A computer program contained on a computer readable media configured to perform the steps of:

- transmitting a first mobile agent with a media availability query to a potential vendor,  
said first mobile agent configured to dynamically adjust to varying conditions;

- receiving, via said first mobile agent, media availability from said potential vendor;
- processing said first mobile agent to create a media buy confirmation and, in response, creating a second mobile agent representing said media buy confirmation;
- transmitting said second mobile agent representing said media buy confirmation to said potential vendor;

- returning a third mobile agent representing an ad run confirmation; and

- processing said third mobile agent to create a post-log entry and, in response, creating a discrepancy notification.

Claim 21 (previously presented): The computer program of claim 20 further configured

to perform the steps of:

generating a buy authorization form including a first level of detail characterizing an advertising campaign;

accepting, via a fourth mobile agent said buy authorization form;

processing said fourth mobile agent; and

identifying potential vendors and, in response, generating said first mobile agent containing said media availability query to said potential vendor.

Claim 22 (previously presented): The computer program of claim 20 further configured to perform the steps of:

generating a media campaign proposal and, in response creating a fifth mobile agent representing said media campaign proposal;

transmitting said fifth mobile agent representing said media campaign proposal to a client;

accepting, via a sixth mobile agent, client approval of said media campaign; and

processing said sixth mobile agent to include information contained in said media campaign in said media buy confirmation.

Claim 23 (previously presented): The method of claim 1 wherein said potential vendor is a pre-selected vendor.

Claim 24 (previously presented): The computer system of claim 11 further configured to perform the step of developing a client job order.

Claim 25 (previously presented): The computer program of claim 20 wherein said potential vendor is a pre-selected vendor.

Claim 26 (previously presented): The computer program of claim 22 further configured to perform the step of:

developing a client job order.
